EXPERIENCE

Globe Telecom **April 2026 - July 2026**

Service Quality Assurance Intern (Google Cloud/JavaScript/HTML/Python)

- Developed a tool for customer ticket resolution and site health checking platform via Google Appscript: **Project DEA.**
- Constructed streamlined data pipelines from differing manual data sources to a usable dashboard and interactive file upload system, significantly reducing time on manual queries and data pre-processing.
- Reduced the amount of BigQuery SQL calls used for VIP Gold Sites Service tracking, effectively lowering query costs by 80%
- Automated the process of demarcating KPIs, updating Platinum user base list, and weekly reports.

MMCL Student Affairs Office **April 2024 - April 2026**

Student Assistant (Python, MS 365/Excel/Power Automate)

- Implemented operation changes for the scholarship application and verification process for 700+ applicants, shifting from manual to online processing.
- Developed reusable scripts and workflows for mass scholarship email distribution with customizable text, attachments, links, and signatures.
- Digitized student records by transferring paper documents and records to an online database.

Mapúa Malayan Car Parking and Car Pooling Development Team **April 2025 - August 2025**

Backend Developer (ASP.NET Core/React)

- Worked with MMCL's *Information and Technology Service Office* in an Agile-Scrum environment with 5 other developers.
- Developed the text messaging, group messaging, and notification features capable of sending live updates to all concerned devices.
- Changed the Login Module to enable Single Sign-on with MMCL's Microsoft domain
- Designed the Carpooling app database and developed complete CRUD API endpoints.

EDUCATION

Mapúa Malayan Colleges Laguna **2021-2026**

Bachelor of Science in Computer Science

PROJECTS

WASP *(React/Python/Arduino)* **July 2024**

- A three-part application that uses a hybrid PSO-NN model to rank the collection points within an area for a more data driven waste collection process
- It leverages IoT-enable waste bins, equipped with ultrasonic sensors, to feed data into the model and make more accurate predictions

Chatbot *(n8n/Whatsapp)* **June 2026**

- An AI assistant that can read messages, use RAG, and send automated responses

CERTIFICATIONS

Google Cloud Certification
Follow this link for my Google profile

COMPTIA Tech+ Certification
Follow this link for my Comptia Certification

EXTRACURRICULAR ACTIVITIES

ASEAN AI Hackathon 2026 (Team Isprikitik)

- In-charge of the mobile design for the improved version of our WASP project, a smart-city waste collection initiative for Cabuyao City.
